Wage Subsidy Scheme

An Australian Government commitment to promoting employment opportunities for people with a disability.

Through the Disability Employment Services (DES) program, Community Solutions help people with a disability, injury or health condition to find and sustain suitable employment. This support is provided through individually-tailored employment services, with links to training, health and community services, and skills development.

Community Solutions also offer recruitment services and individualised support to Employers who recruit a person with a disability, injury or health condition. The Wage Subsidy Scheme can provide you with financial support and incentives for those employees who work for a minimum of 8 hours per week.

**Community
Solutions**

A CoAct Accredited Employment Service Partner

All placements must meet the standard Wage Subsidy Eligibility Guidelines, however – it's easy – we will guide you through the process.

See the example (right) for the financial benefits to your organisation.

On the job support

At no cost to employers, we can also assist with getting your new employee settled into their new job, and with any training or support they may need along the way.

Our goal is to get you the right employee for your business and to assist them with building their competence, confidence and independence in your workplace.

Subsidy example

Based on one week

Wage/hour \$18

Hours/week 8

Example wage/week \$144

Wage subsidy/week \$100

Employer cost/week \$44
