

Support Coordination

The NDIS is an exciting opportunity for people with disability to have more choice and control.

Our Support Coordinators will work with you to coordinate your services and help you use your funding to achieve your goals.

We can help you find the best services to get the most from your NDIS Plan, and help you build skills and independence to coordinate your own supports.

To help you achieve your goals your Support Coordinator will work with you to:

- Find services to meet your needs as outlined in your NDIS Plan
- Get quotes for services and get the most from your funding
- Oversee and coordinate service providers
- Negotiate how and when you get support, including service agreements
- Share information between your providers with your consent
- Build your skills, capacity and independence to coordinate your own supports.

Community Solutions – making a difference in people’s lives, supporting their goals and working with them on their pathway to possibilities.

We provide Coordination of Supports and Specialist Support Coordination at one of our office locations or by phone or Skype.
