

# After skilled, motivated individuals for your business?

**Whether you need a trainee for work experience or an apprentice equipped with a Certificate I in Engineering, we have you covered!**

Community Solutions have secured Queensland Government funding to deliver employment-based pre-apprenticeship training, offering a Certificate I in Engineering to support the local manufacturing industry.

Trainees will complete 13 weeks of paid full-time training at TAFE, which includes three weeks of work placement. Insurance and personal protective equipment (PPE) are fully provided.

By hosting a trainee, you'll have the opportunity to assess their potential in a real work environment. If it's a great match, you can seamlessly transition them into an apprenticeship through our trusted Group Training Organisation (GTO) model.

## **Bonus: Limited-time opportunity for SMEs!**

The Department of Employment and Workplace Relations has just launched the GTO Reimbursement program, offering support to small and medium enterprises (SMEs) with 199 or fewer employees that haven't hosted an apprentice via a GTO in the last 2 years.

Eligible businesses can access:

- \$100 per week, up to a maximum of \$5,200 (GST inclusive) over 52 weeks, for hosting an Australian Apprentice through a GTO.
- Only 400 places available nationally until January 2026.

Chat with our team today to find out whether your business is eligible and be kept up to date with any other initiatives that might be right for your business!
